

SCHÜCO FOCUSING

DISCOVER NEW QUALITY!

EUROCOLOR presents the new quality of SCHÜCO Focusing windows, designed for those who appreciate the combination of modern technology and elegance. **SCHÜCO Focusing is a unique window offering maximum insulation, care for the environment and the highest level of security.**

Branded profiles

Due to their optimum width, PVC profiles provide excellent thermal and acoustic insulation and an exceptional level of security.

Innovative hardware

Comfort and security at the highest level due to the patented KoPiBo roller, sash lifter, four security points and advanced ventilation systems.

Energy-efficient glazing

Metal-free, triple-glazed glazing packages offer durability and energy efficiency for years to come!

NOW AT A SPECIAL PRICE

Excellent insulation and energy savings

- The modern profile and glazing packages, provide ideal thermal and acoustic insulation.
- The heat transfer coefficient (U_w) is only **0,83 W/m²K**, which significantly contributes to energy savings and thermal comfort throughout the year.

Exceptional safety and convenience

- The KoPiBo roller, sash lift and four security points of the window provide full protection against unauthorised access.
- An advanced ventilation system allows you to enjoy fresh air.

Rich colours and style to match any interior

- **The 80 colours** make it possible to perfectly match the windows to the interior or façade design.
- SCHÜCO Focusing is a combination of functionality and aesthetics that works well in both traditional and minimalist settings.
- Narrow rebates for a modern look (Aluminium Look).
